Infos & personal stories

4-week postgraduate courses on malaria prevention, control and elimination

What we offer

Four weeks residential courses with 4 modules, 27 topics, 200 hours of preparational and on-site learning around malaria prevention, control and elimination. The program includes lectures, peer-to-peer learning, group work, educational visits and cultural events. The host countries are Tanzania (Bagamoyo & Zanzibar) and Laos (Vientiane). The organization of the course is under the Swiss Tropical and Public Health Institute with co-organizers the Ifakara Health Institute, the Zanzibar Malaria Elimination Programme and the Lao Tropical and Public Health Institute. Free participation of the selected course participants from malaria affected countries thanks to your generous sponsorship funds.

Who we target

This postgraduate course is designed for individuals involved in malaria research or malaria control and elimination (health personnel, scientists and researchers, public health specialists and malaria control administrators). 16 participants per course from malaria affected countries will be selected by the Scientific Committee through an application process.

What impact we have

After sixteen years and seven cohorts, our malaria course has impacted many lives (2007/2012/2014 Ifakara, 2017/2019 Bagamoyo, 2022 (2x) Bagamoyo & Zanzibar).

- A total of 111 participants from 31 malaria affected countries completed the course enabling them to apply the knowledge and experience gained in their daily work.
- By reinforcing knowledge and expertise in malaria and transferable skills, we aim at strengthening the capacity at country level through our alumni course participants.
- Tanzania and Laos as the host countries and the local co-organizers benefit and advance from the multiple exchanges and best practices shared during the courses.
- Over the years we worked together with 39 facilitators, global leaders from 14 malaria affected and non-affected countries.
- The alumni platform keeps the links among participants and between participants and facilitators offering the possibility to exchange beyond the on-campus weeks as well as the chance to build a network among the now over 100 individuals involved in the course!
- The alumni newsletter features personal stories, tips & tricks, provides a list of upcoming events, grants, training and includes a list of recent articles authored by our alumni. The newsletter received excellent evaluation and new ideas to implement.
