

International PhD Programme

Infection Biology

Join our international PhD programme and conduct molecular infectious disease research on pathogens of global health importance.

Learn state-of-the-art techniques in molecular biology, bioinformatics, imaging and more.

Take part in research, lectures and practical training with distinguished scientists.

Work in an interdisciplinary and collaborative environment.

Programme Begins August 15, 2014

Basel, Switzerland

For more information visit: www.ippib.ch

Application deadline: April 1, 2014

Applicants should hold a Masters Degree, DEA, or equivalent scientific degree recognized by the University of Basel.

Students from national and international universities, and especially from developing countries, are encouraged to apply.

Organisers:

- Swiss Tropical and Public Health Institute
- Centre of Cellular Imaging and Nano Analysis
- Bioinformatics Biozentrum and Swiss Institute of Bioinformatics
- Institute of Molecular Systems Biology, ETH Zürich
