Implementome a platform for online discussions for CoP

Why the gdhub hosts CoP in Digital Health?

CDSS Implementor

I want to hear about the experience of colleagues who have done the same work before. How other projects face similar challenges to mine?

With CoP, you can find all this information and relevant actors.

What is a Community of Practice?

Communities of Practice connect people in meaningful ways,

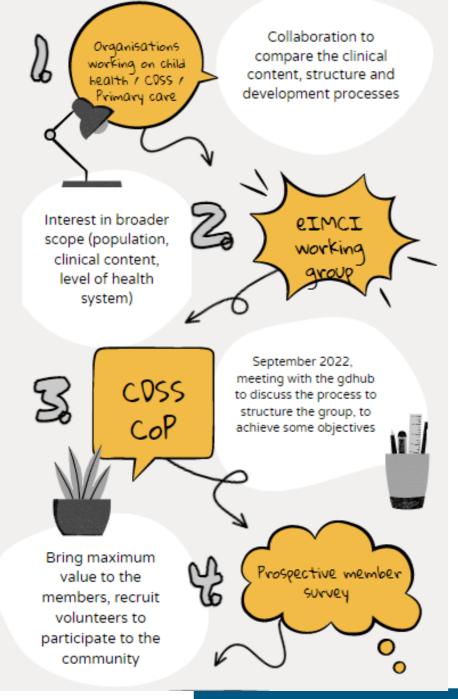

to learn and share one another,

in a particular domain area

to build everyone's knowledge and capabilities, so that

Individually, we are better at what we do, Collectively we achieve much greater impact

Creation of a CDSS CoP

Community building is a group effort

PEOPLE

A community consists of different people with different levels of commitment

Core Team (3 to 5 people up to 8-9)

Organizers

Core Group (4 to 5 up to 15)

members most interested and passionate who will volunteer to make the community a success by regularly contributing and helping engage wider membership

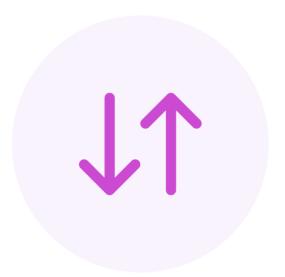

Active members and peripheral members

Contribute to content, attend to event or only consume the content

What is your area of work with CDSS?

Which do you see as the high priority topics for collaboration, sharing and learning for CDSS (select all that apply; then rank top 3)

⁽i) Start presenting to display the poll results on this slide.

How would you like to engage with a CDSS community of practice to share learning & expertise? (select all that apply)

How would you be willing to contribute to a CDSS community of practice?

Please add your contact details so that we can follow-up with you afterwards. Leave blank if you wish to stay anonymous

Thank you
