UN SIÈCLE D'INFLUENCE
EN SANTÉ RESPIRATOIRE

The Union's contribution for ending TB, and for achieving the global targets

Kobto Ghislain KOURA

Background

- The Union links with WHO and global strategies for TB control
- Bold commitment – Where are we?
- Eliminate TB: important goal, achievable
- Last year: The Union's strategy for ending TB, and for achieving the global targets.
- Proposal: consistent with the global consensus, re-focuses on some key elements and reinvigorates the commitment to end TB in the near future.

Objectives for 2022 to 2027

1. End the endemic transmission of TB (Find all TB cases and ensure they receive and complete their treatment)
2. Prevent progression to TB disease in infected individuals
3. Effective care and management of people with TB and drug-resistant TB
4. Engage care providers in public and private sectors to address the special needs of children with TB and adults with TB-related disabilities, co-morbidities and risk determinants
5. Prevent airborne spread of TB in healthcare and other indoor settings
6. Enhance community engagement to prevent TB-affected families from facing catastrophic financial and social costs due to an episode of TB

The Union's strategy – 1

- Implementing and supporting the scale-up of new developments in prevention, diagnosis and treatment that are evidence-based
- Focus on high TB burden settings in low- and middle-income countries
- Expand community engagement, support community leadership of efforts to end TB Advocate for increased resources
- Advocate for Political engagement

The Union's strategy – 2

- A robust integrated membership
- Capacity building and dissemination of knowledge and best practices through our Journals, Training & Education Department and The annual Conference (this year in-person in Paris after the UNHLM meeting)
- Undertake high-quality, relevant clinical, public health and operational research
- Important to work hand in hand in mutual confidence and respect

Thank you for your attention
