

Global Health in the 21st Century

Swiss TPH
Virtual Symposium

28-30 June 2021

www.swisstph.ch/events

Though much progress has been made in improving global health, many new obstacles have emerged. Join the discussion on the challenges and opportunities ahead, what cutting-edge research has to offer, and case studies from around the world.

- The enigma of achieving quality care for all and the Sustainable Development Goals
- New disease-related challenges and trends in health
- The role of the private sector in improving health
- COVID-19 impact, vaccine roll-out and hesitancy
- Future national and global health priorities

Swiss TPH

Program Content

*Günther Fink, Associate Professor of
Epidemiology and Household Swiss
TPH/University of Basel*

Event Organization

*Joanne Blackwell,
Communications Expert*

The Pandemic as an Eye-Opener

- Infections and Non-Communicable Diseases are interrelated
- «Old» and «new» risks affect people globally
- Data protection is important – not having health data is dangerous
- Public Health policies are about finding the right balance
- Translational collaboration and Public-Private-Partnership matter

We are all in one boat – Public Health builds bridges

Locally rooted

Globally connected

The Swiss and Cantonal Perspective on Future Health Challenges,

Lukas Engelberger, Councilman and Head of Basel-Stadt Department of Health

A Global Repositioning of Non-Communicable Diseases

Majid Ezzati, Chair of Global Environmental Health, Faculty of Medicine, Imperial College London
