

Global Health in the 21st Century

Swiss TPH
Virtual Symposium

28 – 30 June 2021

Photo: DNDI

Though much progress has been made in improving global health, many new obstacles have emerged. Join the discussion on the challenges and opportunities ahead, what cutting-edge research has to offer, and case studies from around the world.

- The enigma of achieving quality care for all and the Sustainable Development Goals
- New disease-related challenges and trends in health
- The role of the private sector in improving health
- COVID-19 impact, vaccine roll-out and hesitancy
- Future national and global health priorities
