One Health

The Theory and Practice of Integrated Health Approaches

2nd Edition

Edited by **Jakob Zinsstag**, Swiss Tropical and Public Health Institute, Switzerland, **Esther Schelling**, Vétérinaires Sans Frontières Suisse, Switzerland, **Lisa Crump**, Swiss Tropical and Public Health Institute, Switzerland, **Maxine Whittaker**, James Cook University, Australia, **Marcel Tanner**, Swiss Tropical and Public Health Institute, Switzerland, **Craig Stephen**, University of Saskatchewan and University of British Columbia, Canada

October 2020 | 472pp

One Health has now expanded beyond discussion of emerging infectious diseases and zoonoses. Retaining its interdisciplinary focus, this new edition includes more non-infectious disease issues and climate change discussion alongside revised case studies and expanded methodology chapters to draw out implications for practice.

One Health, the concept of combined veterinary and human health, incorporates a wider suite of health issues. Retaining its interdisciplinary focus which combines theory with practice, this new edition illustrates the contribution of One Health collaborations to real-world issues such as sanitation, economics, food security and vaccination programmes. It includes more non-infectious disease issues and climate change discussion alongside revised case studies and expanded methodology chapters to draw out implications for practice. Promoting an action-based, solutions-oriented approach, One Health: The Theory and Practice of Integrated Health Approaches highlights the lessons learned for both human and animal health professionals and students.

KNOWLEDGE FOR LIFE

Contents

Section 1: Theoretical Foundations

- 1: One health in history
- 2: Theoretical issues of One Health
- 3: An ecological and conservation perspective
- 4: Grappling with complexity: The context for One Health and the ecohealth approach
- 5: Toward a healthy concept of health

Section 2: Methods, Skills and Perspectives for the Practice of One Health

- 6: Transdisciplinary research and One Health
- 7: The role of social sciences in One Health – reciprocal benefits
- 8: One Health study designs
- 9: Surveillance and response conducted in a One Health context
- 10: One Health economics
- 11: A Legal Framework of One Health: the human animal relationship
- 12: Animal-human transmission models
- 13: A One Health Perspective for Integrated Human and Animal Sanitation, Nutrient Recycling, and Climate Change
- 14: Reaping One Health Benefits through Cross-Sectoral Services
- 15: One Health Leadership and Team Building Training

Section 3: One Health in Practice

- 16: The Practice of One Health: Lessons Learned
- 17: Climate change: the ultimate One Health challenge

Section 3a: Infectious Disease

- 18: Emergence of antimicrobial resistance and interaction between humans, animals and environment
- 19: Integrated rabies control
- 20: Brucellosis surveillance and control: a case for One Health
- 21: Human and animal African trypanosomiasis
- 22: Bovine tuberculosis at the human-livestock-wildlife interface in sub-Saharan Africa

Section 3b: Non-communicable Disease

- 23: The Role of Companion Animals in Supporting Human Patients with Non-communicable Diseases
- 24: Towards Resilience: The One Health Approach in Disasters
- 25: Food security and nutrition
- 26: Benefits of Human–Animal Interactions for Mental Health and Well-being
- 27: The Spiritual Dimension of Health

Section 4: Governance and capacity building

- 28: Academic and Institutional ‘One Health’ Research Capacity Building
- 29: One Health in Policy Development: Options to prevent rabies in cattle in Bhutan
- 30: One Health into action: Integrating global health governance with national priorities in a globalised world
- 31: Measuring added value from integrated methods: Towards a Game Theory of One Health
- 32: Summary and outlook: One Health in practice
