One Health
The Theory and Practice of Integrated Health Approaches

Edited by J Zinsstag, Swiss Tropical and Public Health Institute, Switzerland, E Schelling, Swiss Tropical and Public Health Institute, Switzerland, D Waltner-Toews, University of Guelph, Canada, M Whittaker, University of Queensland, Herston, Australia, M Tanner, Swiss Tropical and Public Health Institute, Switzerland

A practical book which examines the origins of One Health and discusses how to put policy into practice

overview

The One Health concept of combined veterinary and human health continues to gain momentum, but the supporting literature is sparse. In this book, the origins of the concept are examined and practical content on methodological tools, data gathering, monitoring techniques, study designs, and mathematical models is included. Zoonotic diseases, with discussions of diseases of wildlife, farm animals, domestic pets and humans, and real-world issues such as sanitation, economics, food security and evaluating the success of vaccination programmes are covered in detail. Discussing how to put policy into practice, and with case studies throughout, this book combines research and practice in one broad-ranging volume.

audience

Veterinarians, medics and academics interested in animal or environmental science

March 2015 / Hardback / 496 Pages / 9781780643410 £125.00 / €165.00 / $240.00
Contents

Theoretical Foundations
1. One Health in history
2. Theoretical issues of One Health
3. The human-animal relationship in the law
4. One Health: An ecological and conservation perspective

Methods for the assessment of the animal-human linkages
5. Measuring added value from integrated methods
6. The role of social sciences in One Health – reciprocal benefits
7. The role of human-animal interactions in education
8. Integrated risk assessment – foodborne diseases
9. A One Health perspective for integrated human and animal sanitation and nutrient recycling
10. One Health study designs
11. Animal-human transmission models
12. One Health economics
13. Integrated human and animal demographic surveillance

Case studies from research to policy and practice
14. Brucellosis surveillance and control: a case for One Health
15. Bovine tuberculosis at the human-livestock-wildlife interface in sub-Saharan Africa
16. Integrated rabies control
17. Leptospirosis: Development of a national One Health control program in Fiji
18. Human and animal African trypanosomiasis
19. Non-communicable diseases: How can companion animals help in connection with coronary heart disease, obesity, diabetes and depression?

20. Integrated One Health Services
21. Beyond fences: wildlife, livestock and land use in southern Africa
22. Better together: identifying the benefits of a closer integration between plant health, agriculture and One Health
23. Food security, nutrition and the One Health nexus
24. One Health into action: Integrating global health governance with national priorities in a globalized world
25. One Health in policy development: An integrated approach to translating science into policy

Capacity building, public engagement and conceptual outlook
26. Evolution of the One Health Movement in the United States
27. Institutional research capacity development for integrated approaches in developing countries: an example from Vietnam
28. Enabling academic One Health environments
29. Individual and institutional capacity building in global health research in Africa
30. Transdisciplinary research and One Health
31. Operationalizing One Health for local governance
32. Non-governmental organizations in One Health
33. Toward a healthy concept of health
34. Grappling with complexity: the context for One Health and the ecohealth approach
35. Summary and outlook of practical use of One Health
